🧠 TECHNICAL SKILLS

Offensive Security

Nmap, Metasploit, Burp Suite, Gobuster, Wireshark, Kismet, aircrack-ng, Netcat, John the Ripper

Operating Systems

Kali Linux, Parrot OS, Ubuntu, Linux Mint, Windows

Networking

TCP/IP, DNS, DHCP, HTTP/HTTPS, Packet Analysis, Network Enumeration, Wireless Recon

Programming

Python, Bash, JavaScript, SQL, VBScript, HTML

Databases

MSSQL Server, Oracle, MySQL

Tools & Platforms

Git, VS Code, REST APIs, Docker, Hack The Box, TryHackMe

🎓 EDUCATION

Bachelor of Science — Computer Information Systems

Southwest Texas State University (now Texas State University)
2007 – 2007 | San Marcos, TX

📜 CERTIFICATIONS

eLearnSecurity Junior Penetration Tester (eJPT)

Completed: February 2026

OSCP - Offensive Security Certified Professional

Target - September 2026

Commercial Driver's License Class A

Completed: 2025

📋 SUMMARY

Systems engineer and hands-on technologist who spent years keeping factories running in the Bering Sea, building custom homes from the ground up, and writing enterprise data migrations before pivoting into offensive security.

Certified Junior Penetration Tester (eJPT) with extensive lab experience in enumeration, exploitation, and privilege escalation. Currently building a home lab and creating detailed walkthroughs for vulnerable VM exploitation. Brings an uncommon combination of operational grit, software engineering depth, and a problem-solver's mindset to security roles requiring both technical precision and real-world resilience.

🔧 CYBERSECURITY EXPERIENCE

Offensive Security Labs & Independent Research

2018 – Present

- Network Reconnaissance — Performed service enumeration on HTB and TryHackMe boxes using Nmap, Masscan, and manual techniques
- Web Exploitation — Exploited SQL injection, XSS, and file inclusion vulnerabilities in controlled lab environments
- Privilege Escalation — Executed post-exploitation techniques on Linux and Windows targets
- Packet Analysis — Analyzed network captures with Wireshark to identify attack patterns and anomalous traffic
- Wireless Security — Conducted reconnaissance and security assessments using Kismet, aircrack-ng suite, and Wireshark since 2018
- Content Creation — Building comprehensive walkthroughs for 5+ vulnerable VMs for cybersecurity portfolio with detailed technical write-ups

👤 PROFESSIONAL EXPERIENCE

JavaScript Developer – 1Hive DAO

2021 – 2023 | Remote

- Developed and enhanced decentralized exchange and governance platform applications
- Implemented user interface improvements and functionality enhancements
- Collaborated with globally distributed technical teams in a remote environment
- Worked with blockchain technologies and smart contract ecosystems

Self-Employed / 1099 Contract

Journeyman Carpenter

2012 – Present | Washington, California, Texas

- Project Management — Led full remodels of 25+ kitchens and bathrooms from initial design to final installation
- Independent Operations — Managed projects independently including budget, materials, scheduling, and client relations
- Precision Work — Developed attention to detail and the ability to visualize complex systems before execution

ADDITIONAL

Languages

- English (Native)
- Spanish (Conversational)
- Thai (Conversational)
- Indonesian (Conversational)

Current Focus

Building a homelab with vulnerable web applications; OSCP coursework & creating detailed VM exploitation write-ups for portfolio

Background

Texas bred and fed, world traveler that remains within 2 miles of a boxing gym and 10 feet from a guitar

Trident Seafoods / Clipper Seafoods

Factory Maintenance Technician / Deckhand

2012 – 2025 | Bering Sea, AK

- Mechanical Systems — Maintained, diagnosed, and repaired hydraulic motors, pumps, conveyor systems, and production equipment in remote Bering Sea facilities operating 24/7 during fishing seasons
- Emergency Response — Responded to mechanical failures under extreme conditions — 17-hour shifts, subzero temperatures, heavy seas — minimizing downtime and keeping production running
- Commercial Fishing — Operated longline fishing gear in one of the most demanding commercial fishing environments on earth
- Crisis Management — Developed discipline, situational awareness, and the ability to execute under physical and mental stress that translates directly to incident response and security operations
- Team Coordination — Collaborated with multidisciplinary crews to keep multi-million dollar operations functional when failure was not an option

JavaScript Developer – 1Hive DAO

2021 – 2023

Pervasive Software

Software Engineer Consultant

2008 – 2009 | Austin, TX

- Data Integration — Designed and implemented complex data integrations for enterprise clients, working directly with C-level executives
- Development — Wrote VBScript, JavaScript, and T-SQL to extract, transform, and migrate data between MSSQL, Oracle, and other DBMS
- Client Delivery — Delivered mission-critical solutions on tight deadlines in a client-facing consulting role

Friedrich Air Conditioning

Systems Analyst

2007 – 2008 | San Antonio, TX

- Software Development — Developed and maintained enterprise manufacturing software
- Database Management — Managed database systems and backup processes
- Network Support — Maintained RFID and wireless network infrastructure

Earthlink Internet Services

Technical Support Representative

2002 – 2005 | San Antonio, TX

- Technical Support — Diagnosed residential internet connectivity issues and guided customers through resolution
- Documentation — Documented incidents and maintained high customer satisfaction metrics
